

Required DRDP Training for Special Education

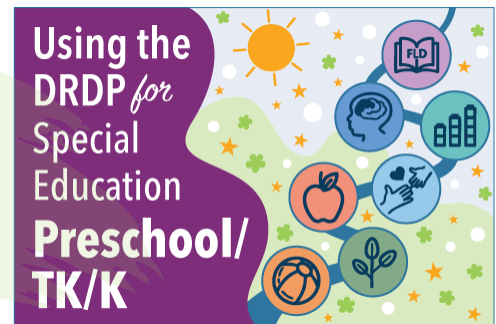

The California Department of Education, Special Education Division, requires DRDP training for all special educators who assess children with the DRDP.

Two courses are available for the DRDP (2025)!
Complete both to meet your DRDP (2025) training requirements:

1

Choose the
version for
the children
you serve

2

Strengthen rating
skills & build
confidence through
guided practice

These trainings support
authentic assessment,
instructional planning,
and positive outcomes
for all children!

All required training is accessed through [DRAccessLearn.org](https://draccesslearn.org)

- When creating an account with [DR Access Learn](https://draccesslearn.org), assessors should make sure to select the correct District and SELPA to ensure their training progress goes to the correct SELPA.
- DR Access Learn account login is unique and not associated with other Desired Results Access Project logins such as DR Access Reports.
- Courses will appear in the learner's account one at a time. Once a course is completed, the next one will become available.

SELPA's are responsible for ensuring that all staff who administer the DRDP complete the required training. Assessors must complete the DRDP for all eligible children *regardless* of course completion status. SELPA Directors will receive training status reports throughout the year.
